This sounds to me like a bunch of children fighting over one rubber ball, it's stupid, personally I am getting tired of one local station playing all the commercials AGAINST sattillite radio. I see no problem with the entire existance of sattillite radio, I am a proud subscriber of XM satillite radio, and go nuts when I have to listen to FM radio just because of all the retarded commercials, especially the male enhancement commercials, you can tell who finances the majority of the FM stations!!
